*Lasershot Virtual Shoothouse*

Lasershot provides a cost efficient and training effective method for delivering CQB training through custom, non-ballistic shoot house packages. This line of Real Combat™ integrates Lasershot's exclusive CQB hardware and software technologies into a custom built or existing non-ballistic shoot house to engage threats using laser-based training weapons or non-lethal ammunition such as SESAMS or Simunition™.

- Laser-based packages available for use with any of Lasershot's laser-based training weapons
- Exclusive Thermal Shot™ packages available for the use of non-lethal training rounds such as SESAMS or Simunition™
- Lasershot engineers will custom design a new non-ballistic shoot house or your existing non-ballistic facility to fit your training objectives
- Packages are available to various levels of complexity to meet any budget and are expandable throughout the life of the system
