

Old Static CQB Targetry

Dynamic Virtual Targetry

FEATURING

Laser Shot's Real Combat™ Range Modernization packages include sophisticated hardware and software that will upgrade an existing live fire shooting range into become a premier, high technology, live fire training facility. With a Range Modernization package, Soldiers will be immersed in a highly realistic CQB training environment on a variety of skill levels, culminating in a coherent live fire scenario for any number of rooms.

Laser Shot's exclusive Real Combat™ Range Modernization packages utilize the advanced technology of the Thermal Shot™ Live Fire Virtual Targetry System with the state-of-the-art courseware of Lasershot Virtual Shoothouse (LVS).

Climate Controlled Protective Shroud for Open Air Installations

Range Modernization Provides:

- Replace your shoot house's old static targetry with state-of-the-art, 3D moving targets
- Professionally installed custom hardware packages for every range installation including climate control options for open air ranges
- CQB training using live-fire and/or laser based weaponry
- Limitless target engagement zones – limited only by the size of a shoot house
- Instructor Control Station with remote control options
