

CROSSHAIR

DOWN RANGE VIRTUAL TARGETRY SYSTEM

Laser Shot's industry-exclusive outdoor Sniper Training System is designed utilizing Laser Shot's exclusive Thermal Shot™ Live-Fire Virtual Targetry System and the latest state-of-the-art projection equipment to enable large, pristine virtual targetry in an outdoor environment. The Crosshair System is a mobile platform that enables users to shoot at life-sized, 3D human characters that move and react as real humans at their pre-existing outdoor training range with no modifications. The Crosshair system is composed of two primary components described below, the Thermal Shot™ Live-Fire Virtual Targetry System and mobile steel containers.

- Industry exclusive down range targetry system
- Utilizes state-of-the-art projection equipment to enable large, pristine virtual targetry in and outdoor environment
- Life size virtual targets enable engagements from unlimited distances in order to simulate realistic combat scenarios
