

Laser Shot produces a full line of marksmanship training systems to include mobile systems, squad level and higher classroom systems, and long range tactical systems. Real Combat™ Marksmanship systems provide firearms instructors with custom and flexible training solutions through the ability to build the system as they need, hardware to software, without being restricted to pre-bundled packages. Real Combat™ Marksmanship systems are compatible with all Laser Shot courseware and all individual and crew served laser based training weapons.

TWS/MSET Classroom Trainer

Tactical Weapon Simulator/MSET packages are available in two portable sizes for firearms training “on-the-go” or to turn any room into a temporary training room.

- Available for laser-based or live-fire (Thermal Shot™) training
- No dedicated operator required – quick and easy setup will have you training ready in under 15 minutes
- Multi-Screen options available
- High Definition projection and Surround Sound available
- Use with any of Laser Shot’s inert or simulated recoil laser-based training weapons. Sensored training weapons available.

TWS/MSET Deployable Trainer

Combined Arms Collective Trainer

The Combined Arms Collective Trainer is a comprehensive marksmanship and tactical training system that supports an assortment of weapon systems for a variety of military operations.

- Provides Squad level and higher marksmanship and tactical training
- Supports CAS and Indirect Fire Training
- Large immersive displays with weapon mounted eyepoint control for tactical training
- Expandable to any number of firing lanes
- Use with any of Laser Shot’s inert or simulated recoil laser-based training weapons. Sensored training weapons available.
